- Always replace both lift supports when applicable to assure top performance and prevent twisting caused by uneven loading
- StrongArm shaft supports typically store a gas charge of over 1500psi and cannot be compressed by hand
- StrongArm gas charged lift supports can be installed in minutes with no special tools required
- Careful inspection of all hinges and lift support connecting points should be made for wear and tear, or stress fractures and should be replaced or repaired before lift support installation
- Design of lift support is subject to change without notification.
